FOREST MANAGEMENT CERTIFICATION (FMC)

IN PENINSULAR MALAYSIA

Forest Management Certification is a voluntary assessment system to certify that forest management practices for Forest Management Unit fulfil specific standards covering social, economic, and environment aspects

Pensijilan Pengurusan Hutan ialah sistem penilaian bebas untuk mengesahkan bahawa amalan-amalan pengurusan hutan bagi Unit Pengurusan Hutan memenuhi piawaian tertentu meliputi aspek sosial, ekonomi, dan alam sekitar

FOREST CERTIFICATION IMPACTS
Impak Pensijilan Hutan

Importance
OF FOREST MANAGEMENT CERTIFICATION
KEPENTINGAN PENSIJILAN PENGURUSAN HUTAN

Recognition that a Permanent Reserve Forest (PRF) area is managed in accordance with Sustainable Forest Management

Pengiktirafan bahawa kawasan Hutan Simpanan Kekal (HSK) adalah diurus mengikut Pengurusan Hutan Secara Berkekalan

The country's timber products meet international trade requirements and regulations

Produk kayu-kayan negara menepati keperluan dan ketetapan perdagangan antarabangsa

Forest areas are unseen solely as a source of timber production, but emphasis is placed on aspects of biodiversity conservation, the environment, and community well-being

Kawasan hutan tidak dilihat sebagai sumber pengeluaran kayu-kayan sahaja namun penekanan kepada aspek pemeliharaan biodiversiti, alam sekitar, dan kesejahteraan masyarakat

MC&I SFM

Malaysian Criteria and Indicators for Sustainable Forest Management (MC&I SFM) in Peninsular Malaysia is a standard used to evaluate forest management activities for certification purpose

Kriteria dan Petunjuk untuk Pengurusan Hutan Mampan (MC&I SFM) di Semenanjung Malaysia merupakan standard yang digunakan untuk menilai aktiviti pengurusan hutan bagi tujuan pensijilan

9 PRINCIPLES OF MC&I SFM
